Energy performance certificate (EPC)

27 Ffordd Cibyn CAERNARFON LL55 2EB Energy rating

D

Valid until: 18 May 2033

Certificate number:

4037-7725-8200-0371-5292

Property type

Detached house

Total floor area

87 square metres

Rules on letting this property

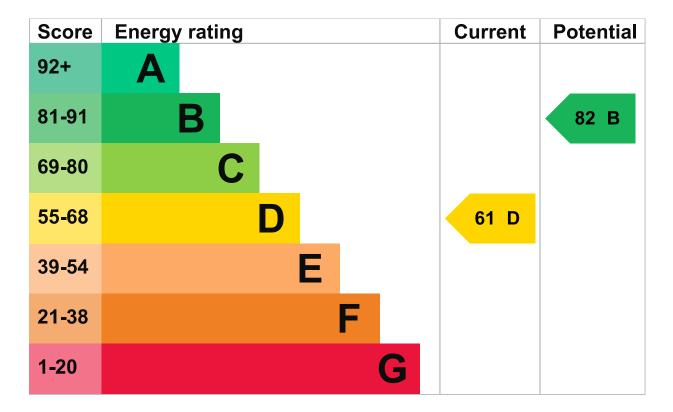

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's current energy rating is D. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Description	Rating
Cavity wall, filled cavity	Average
Pitched, 200 mm loft insulation	Good
Pitched, limited insulation (assumed)	Very poor
Fully double glazed	Average
Boiler and radiators, mains gas	Good
Programmer, room thermostat and TRVs	Good
From main system	Good
	Cavity wall, filled cavity Pitched, 200 mm loft insulation Pitched, limited insulation (assumed) Fully double glazed Boiler and radiators, mains gas Programmer, room thermostat and TRVs

Feature	Description	Rating
Lighting	Low energy lighting in 71% of fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 298 kilowatt hours per square metre (kWh/m2).

► What is primary energy use?

How this affects your energy bills

An average household would need to spend £2,252 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £702 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 11,657 kWh per year for heating
- 2,166 kWh per year for hot water

More ways to save energy

Find ways to save energy in your home.

Environmental impact of this property

This property's current environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.

Carbon emissions

An average household produces

6 tonnes of CO2

This property produces

4.6 tonnes of CO2

This property's potential production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

▶ Do I need to follow these steps in order?

Step 1: Flat roof or sloping ceiling insulation

Typical	installation	cost
. y p.oa.	motanation	000

£850 - £1,500

Typical yearly saving

£74

Potential rating after completing step 1

63 D

Step 2: Floor insulation (solid floor)

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£161

Potential rating after completing steps 1 and 2

65 D

Step 3: Low energy lighting

Typical installation cost

£20

Typical yearly saving

£32

Potential rating after completing steps 1 to 3

66 D

Step 4: Replace boiler with new condensing boiler

Typical installation cost

£2,200 - £3,000

Typical yearly saving

£354

Potential rating after completing steps 1 to 4

71 C

Step 5: Solar water heating

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£80

Potential rating after completing steps 1 to 5

72 C

Step 6: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£3,500 - £5,500

Typical yearly saving

£662

Potential rating after completing steps 1 to 6

82 B

Paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name

Gary Evans

Telephone

01495 234 300

Email

epcquery@vibrantenergymatters.co.uk

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme

Elmhurst Energy Systems Ltd

Assessor's ID

EES/021064

Telephone

01455 883 250

Email
