# Energy performance certificate (EPC)

|  | Energy rating          | Valid until:                 | 12 March 2034 |
|--|------------------------|------------------------------|---------------|
| 1 Quin Square<br>South Hetton<br>DURHAM<br>DH6 2TN | Certificate<br>number: | 9500-0920-0122-2398-<br>3743 |               |
| Property type                                      | S                      | Semi-detached ho             | buse          |
| Total floor area                                   | 7                      | 1 square metres              |               |

# Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for landlords on the regulations and exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

### **Energy rating and score**

This property's energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+   | Α             |         |           |
| 81-91 | B             |         | 86 B      |
| 69-80 | С             |         |           |
| 55-68 | D             | 64 D    |           |
| 39-54 | E             |         |           |
| 21-38 | F             |         |           |
| 1-20  |               | G       |           |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                    | Rating    |
|----------------------|--|-----------|
| Wall                 | Cavity wall, as built, no insulation (assumed) | Poor      |
| Roof                 | Pitched, 75 mm loft insulation                 | Average   |
| Window               | Fully double glazed                            | Average   |
| Main heating         | Boiler and radiators, mains gas                | Good      |
| Main heating control | Programmer, no room thermostat                 | Very poor |
| Hot water            | From main system                               | Good      |
| Lighting             | Low energy lighting in all fixed outlets       | Very good |
| Floor                | Solid, no insulation (assumed)                 | N/A       |
| Secondary heating    | None   | N/A       |

### Primary energy use

The primary energy use for this property per year is 294 kilowatt hours per square metre (kWh/m2).

### **Additional information**

Additional information about this property:

• Cavity fill is recommended

# How this affects your energy bills

An average household would need to spend **£1,478 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £490 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

### Heating this property

Estimated energy needed in this property is:

- 11,516 kWh per year for heating
- 2,019 kWh per year for hot water

| Impact on the environment   |                 | This property produces  | 3.7 tonnes of CO2     |
|---|-----------------|---|-----------------------|
| This property's environmental impact rating is D. It has the potential to be B.                                   |                 | This property's potential production  | 1.4 tonnes of CO2     |
| Properties get a rating from A (best) to G<br>(worst) on how much carbon dioxide (CO2)<br>they produce each year. |                 | You could improve this property's CO2<br>emissions by making the suggested changes.<br>This will help to protect the environment. |                       |
| Carbon emissions  |                 | These ratings are based on assumptions about average occupancy and energy use.  |                       |
| An average household<br>produces  | 6 tonnes of CO2 | People living at the property may use difference amounts of energy.   | rty may use different |

# Changes you could make

| Step   | Typical installation cost | Typical yearly saving |
|--|---------------------------|-----------------------|
| 1. Increase loft insulation to 270 mm          | £100 - £350               | £55                   |
| 2. Cavity wall insulation                      | £500 - £1,500             | £160                  |
| 3. Floor insulation (solid floor)              | £4,000 - £6,000           | £78                   |
| 4. Heating controls (room thermostat and TRVs) | £350 - £450               | £139                  |
| 5. Solar water heating                         | £4,000 - £6,000           | £58                   |

| Step | Typical installation cost | Typical yearly saving |
|------|---------------------------|-----------------------|
|      |                           |                       |

### 6. Solar photovoltaic panels

£3,500 - £5,500

#### Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Find ways to save energy in your home by visiting www.gov.uk/improve-energy-efficiency

### Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | Paul Easton            |
|-----------------|------------------------|
| Telephone       | 0203 397 8220          |
| Email           | support@propcert.co.uk |

#### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme | Elmhurst Energy Systems Ltd    |
|----------------------|--------------------------------|
| Assessor's ID        | EES/013300                     |
| Telephone            | 01455 883 250                  |
| Email                | enquiries@elmhurstenergy.co.uk |
|                      | enquines@einnurstenergy.co.uk  |

### About this assessment

| Assessor's declaration | No related party |
|------------------------|------------------|
| Date of assessment     | 12 March 2024    |
| Date of certificate    | 13 March 2024    |
| Type of assessment     | RdSAP            |
